CONTENTS

Volume 28, Issue Nos. 1–12 (1989)

International Journal for

NUMERICAL METHODS IN ENGINEERING

Issue No. 1

CORRECTION ii

A Decomposition Method for the Integration of the Elastic–Plastic Rate Problem: H. G. Matthies 1

Modal Solution of Transient Heat Conduction Utilizing Lanczos Algorithm: A. L. G. A. Coutinho, L. Landau, L. C. Wrobel and N. F. F. Ebecken 13

Multi-level Finite Element Solution Algorithms Based on Multiplicative and Additive Correction Procedures: C. N. Chen and L. C. Wellford, Jr. 27

Geometrically Non-linear Formulation for Three Dimensional Curved Beam Elements with Large Rotations: K. S. Surana and R. M. Sorem 43

Evaluation of Boundary Integrals for Plate Bending: A. Abdel-Akher and G. A. Hartley 75

Sensitivity Analysis and Shape Optimization of Axisymmetric Structures: T.-C. Cheu 95

A Cubic Triangular Finite Element for Flat Plates with Shear: F.-G. Yuan and R. E. Miller 109

Frictionless Geometrically Non-linear Contact Using Quadratic Programming: A. R. Johnson and C. J. Quigley 127

The Mode-decomposition, C^0 Formulation of Curved, Two-dimensional Structural Elements: H. K. Stolarski and M. Y. M. Chiang 145

Benchmark Computation and Performance Evaluation for a Rhombic Plate Bending Problem: I. Babuška and T. Scapolla 155

Multilevel Dynamic Substructures: A. Y. T. Leung 181

Phase Increment Analysis of Damped Duffing Oscillators: A. Y. T. Leung and T. C. Fung 193

A Simple Stress Error Estimator for Hybrid-Trefftz *p*-Version Elements: J. Jirousek and A. Venkatesh 211

LETTER TO THE EDITOR 237

ANNOUNCEMENTS 239

CONFERENCE DIARY 241

Issue No. 2

A Moving Boundary Circulation Model for Regions with Large Tidal Flats: T. C. Gopalakrishnan 245

The FDM in Arbitrary Curvilinear Co-ordinates—Formulation, Numerical Approach and Applications: W. W. Tworzydlo 261

An Accelerated Iterative Method for Contact Analysis: K. Lee 279

A Deforming Finite Element Method Analysis of Inverse Stefan Problems: N. Zabaras and Y. Ruan 295

A Boundary Element Method Analysis of Electrostatics in a Tank During Filling Operations: A Sidi-Yekhlef and J. E. Sunderland 315

Large Deflection Elastic–Plastic Analysis of Plate Structures by the Finite Strip Method: S. B. S. Abayakoon, M. D. Olson and D. L. Anderson 331

Approximate Direct-search Minimax Circuit Optimization: S. E. Sussman-Fort 359

3-D Shape Optimal Design and Automatic Finite Element Regridding: T.-M. Yao and K. K. Choi 369

Assumed Strain Stabilization Procedure for the 9-Node Lagrange Shell Element: T. Belytschko, B. L. Wong and H. Stolarski 385

A New Moving Finite Element Method Based on Quadratic Approximation Functions: J. A. Hansen and O. Hassager 415

Implementation of Curvilinear Geometry Into *p*-Version HT Plate Elements: J. Jirousek and A. Venkatesh 431

Finite Element Method for Solving MHD Flow in a Rectangular Duct: M. Tezer-Sezgin and S. Köksal 445

A Consistent Characteristic Length for Smeared Cracking Models: J. Oliver 461

BOOK REVIEWS 475

BOOKS RECEIVED 477

CORRECTION 479

ANNOUNCEMENTS 481

CONFERENCE DIARY 483

Issue No. 3

Superconvergent Derivatives: A Taylor Series Analysis: R. J. Mackinnon and G. F. Carey 489

A Subspace Iteration Method for the Eigensolution of Large Undamped Gyroscopic Systems: J. F. D. Rodrigues and T. E. C. Gmuer 511

Mesh Rezoning of 2D Isoparametric Elements By Inversion: R. H. Crawford, D. C. Anderson and W. N. Waggenspack 523

A Discrete Shear Triangular Nine D.O.F. Element for the Analysis of Thick to Very Thin Plates: J. L. Batoz and P. Lardeur 533

Application of Differential Quadrature to Static Analysis of Structural Components: S. K. Jang, C. W. Bert and A. G. Striz 561

An Optimality Criterion Method for Dynamic Optimization of Structures: E. A. Sadek 579

Efficient Optimization of Integrated Aerodynamic–Structural Design: R. T. Hafkta, B. Grossman, W. N. Eppard, P. J. Kao and D. M. Polen 593

A Unified Approach to Solving Ill-Conditioned Matrix Problems: E. Rothwell and B. Drachman 609

A Schwarz Alternating Procedure Using Spline Collocation Methods: E. G. Yanik . . 621

Time-domain Boundary Element Analysis of Elastic Wave Interaction with a Crack: S. Hirose and J. D. Adenbach 629

Structural Modifications Simulated by Virtual Distortions: J. Holnicki-Szulc and J. T. Gierlinski 645

A New C^1 Finite Element: Full Heptic: J. M. Boisserie 667

Weighted Residual Solutions in the Time Domain: L. J. Segerlind. 679

Eigenvalue Analysis of Compatible and Incompatible Rectangular Four-node Quadrilateral Elements: W. L. Hacker and H. L. Schreyer 687

A Stream Tube Based Upper Bound Approach to Plane Strain Metal Forming Analysis: N. D. Walker, Jr.. 705

BOOK REVIEWS 725

CONFERENCE DIARY 727

Issue No. 4

First-order Design Sensitivities for Transient Conduction Problems by an Adjoint Method: D. A. Tortorelli and R. B. Haber. 733

Finite Element Formulation for Non-steady-state Large Deformations with Sliding or Evolving Contact Boundary Conditions: C. Bohatier and J.-L. Chenot 753

Upwind Techniques via Variational Principles: S. R. Idelsohn 769

On Improved Hybrid Finite Elements with Rotational Degrees of Freedom: S. M. Yunus, S. Saigal and R. D. Cook 785

A Comparison of Direct and Preconditioned Iterative Techniques for Sparse, Unsymmetric Systems of Linear Equations: G. Brussino and V. Sonnad 801

Dynamic Three Dimensional Computations for Solids, with Variable Nodal Connectivity for Severe Distortions: G. R. Johnson and R. A. Stryk 817

A New Method for Modelling Reinforcement and Bond in Finite Element Analyses of Reinforced Concrete: R. J. Allwood and A. A. Bajarwan 833

Analysis of Viscoelastic Behaviour of Transversely Isotropic Materials: L. F. A. Douven, P. J. G. Schreurs and J. D. Janssen 845

On the Modelling of Scalar and Mass Transport in Combustor Flows: M. Nikjooy and R. M. C. So 861

Effective and Practical *h-p*-Version Adaptive Analysis Procedures for the Finite Element Method: O. C. Zienkiewicz, J. Z. Zhu and N. G. Gong 879

A New Implementation of the Force Method and the Optimum Design of Large Trusses: K. T. Joseph 893

A Three-dimensional Hydraulic Fracturing Simulator: L. Vandamme and J. H. Curran . 909

Virtual Crack Extension Methods for Non-linear Materials: T. K. Hellen 929

Crypto-DOF Finite Elements: A. Kanarachos and Ch. Provatidis. 943

Free-vibration Analysis of Single-layer and Two-layer Bimodular Beams: J.-S. Wu, H.-S. Jing and C.-R. Cheng 955

Simplifications using Isoparametric Elements in Flexible Linkage Analysis: M. Giovagnoni 967

BOOK REVIEWS 979

CONFERENCE DIARY 981

Issue No. 5

A Bi-cubic Transformation for the Numerical Evaluation of the Cauchy Principal Value Integrals in Boundary Methods: M. Cerrolaza and E. Alarcon. 987

Numerical Analysis of Two-level Finite Difference Schemes for Unsteady Diffusion–Convection Problems: A. Rigal 1001

An Operator-splitting Algorithm for Two-dimensional Convection–Dispersion–Reaction Problems: D. Ding and P. L.-F. Liu. 1023

A Move Coordination Method for Alternative Loads in Structural Optimization: L. Chibani, S. A. Burns and N. Khachaturian 1041

A General Finite Element for Beams or Beam-columns with or without an Elastic Foundation: S. N. Sirosh, A. Ghali and A. G. Razaqpur 1061

Consistent Higher Degree Petrov–Galerkin Methods for the Solution of the Transient Convection–Diffusion Equation: J. J. Westerink and D. Shea 1077

A Numerical Model for the Thermo-elasto-plastic Behaviour of a Material: S. K. Ray and S. Utku 1103

Numerical Differentiation for Use in Integrating Unified Constitutive Equations: G. A. Henshall, T. G. Tanaka, A. K. Miller and T. C. Lowe 1115

Computation of Thermal Stresses in Quasi-static Non-stationary Thermoelasticity Using Boundary Elements: V. Sládek and J. Sládek 1131

An Effective Quadrilateral Plate Bending Element: H.-X. Lui and S.-N. Xu 1145

Duality and Symmetry in Mixed Integral Methods of Elastostatics: J. A. Teixeira de Freitas 1161

The Application of Symbolic Computing to the Hierarchical Finite Element Method: N. S. Bardell 1181

Numerical Solution of Linear Two-point Boundary Problems Via the Fundamental-matrix Method: O. R. Asfar and A. M. Hussein 1205

A Numerical Integration Approach by Weight Factors and its Accuracy: V. Mihailović 1217

CONFERENCE DIARY 1229

Issue No. 6

Infinite Boundary Elements: G. Beer and J. O. Watson 1233

A Mixed Finite Element Model for the Elastic Contact Problem: F. J. Gallego and J. J. Anza 1249

A Dynamic Programming Method for Analysis of Bridges under Multiple Moving Loads: H. Adeli and Y. Ge 1265

Coupled Bending–Torsional Dynamic Stiffness Matrix for Beam Elements: J. R. Banerjee 1283

Preconditioned Conjugate- and Secant-Newton Methods for Non-linear Problems: M. Papadrakakis and C. J. Gantes 1299

On Linear Constraints for Newton–Raphson Corrections and Critical Point Searches in Structural F. E. Problems: A. Eriksson 1317

Adaptive *h*-, *p*- and *hp*-Versions for Boundary Integral Element Methods: E. Rank . . 1335

On a Mixed Finite Element Method for Clamped Anisotropic Plate Bending Problems: S. Gopalsamy, S. Balasundaram and P. K. Bhattacharyya 1351

An Efficient 3-D Infinite Element for Water Wave Diffraction Problems: S. L. Lau and Z. Ji 1371

Boundary Integration and Interpolation Procedures for Plate Bending: A. Abdel-Akher and G. A. Hartley 1389

Adaptive 2D Finite Element Simulation of Metal Forming Processes: H. T. Y. Yang, M. Heinstein and J. M. Shih 1409

A Parallel Mesh Generation Algorithm Based on the Vertex Label Assignment Scheme: F. Cheng, J. W. Jaromczyk, J.-R. Lin, S.-S. Chang and J.-Y. Lu 1429

Development and Applications of Two Singular Points Finite Elements: B. K. Dutta, S. K. Maiti and A. Kakodkar 1449

Stress Intensity Factors by Enriched Mixed Finite Elements: P. R. Heyliger and R. D. Kriz 1461

LETTER TO THE EDITOR. 1485

Issue No. 7

ANNOUNCEMENT ii
More on Optimal Stress Points—Reduced Integration, Element Distortions and Error Estimation: J. Barlow 1487
Some Acceleration Methods for Iterative Computation of Derivatives of Eigenvalues and Eigenvectors: R. C. E. Tan 1505
Softening and Snap-back Instability in Cohesive Solids: A. Carpinteri 1521
A Comparison Between Isoparametric Lagrangian Elements in 2D BEM: A. Deb and P. K. Bannerjee 1539
PCG Methods in Transient FE Analysis. Part I: First Order Problems: I. M. Smith, S. W. Wong, I. Gladwell and B. Gilvary 1557
PCG Methods in Transient FE Analysis. Part II: Second Order Problems: S. W. Wong, I. M. Smith and I. Gladwell 1567
Assumed Stress Function Finite Element Method: Two-dimensional Elasticity: N. Sarigul and R. H. Gallagher. 1577
Non-linear Steady State Vibration of Frames by Finite Element Method: A. Y. T. Leung and T. C. Fung 1599
Adaptive Time-step Control in Creep Analysis: R. Mahnken and E. Stein 1619
A Frontal Technique for Vector Computers: L. Brusa and F. Riccio. 1635
Loading, Unloading and Reloading of a Generalized Plane Plastica: B. A. Coulter and R. E. Miller. 1645
Reusable Intrinsic Sample Point (RISP) Algorithm for the Efficient Numerical Integration of Three Dimensional Curved Boundary Elements: J. H. Kane, A. Gupta and S. Saigal 1661
A Mixed Finite Element Formulation for Reissner–Mindlin Plates Based on the Use of Bubble Functions: P. M. Pinsky and R. V. Jasti 1677
3-D Boundary Element Method for Cracks in a Plate: N. Fares and V. C. Li 1703
A Coarse/Fine Preconditioner for Very Ill-conditioned Finite Element Problems: C. Farhat and N. Sobh 1715
CONFERENCE DIARY 1725

Issue No. 8

EDITORIAL 1731

A Special Beam Element for the Analysis of Thin-walled Structural Components: M. Ashraf Ali and S. Sridharan 1733

An Assumed Strain Finite Element Model for Large Deflection Composite Shells: C. H. Yeom and S. W. Lee 1749

Modelling Liquid–Solid Phase Changes with Melt Convection: J. A. Dantzig 1769

Mixed-interpolated Elements for Reissner–Mindlin Plates: F. Brezzi, K.-J. Bathe and M. Fortin 1787

A Consistent Tangent Stiffness Matrix for Three-dimensional Non-linear Contact Analysis: H. Parisch 1803

Application of the Ritz Method to Plane Elasticity Problems for Composite Sheets with Variable Fibre Spacing: A. F. Martin and A. W. Leissa 1813

Eigensolutions of Non-conservative Continuous Mechanical Systems Computed by use of a Matrix Iteration Method: T. J. S. Abrahamsson and J. H. Sällström 1827

Symmetry-preserving Return Mapping Algorithms and Incrementally Extremal Paths: A Unification of Concepts: M. Ortiz and J. B. Martin 1839

On the Accuracy of Some Domain-by-domain Algorithms for Parallel Processing of Transient Structural Dynamics: J. F. Hajjar and J. F. Abel 1855

Free Vibration of Symmetrically Laminated Plates using a Higher-order Theory with Finite Element Technique: Mallikarjuna and T. Kant 1875

The Problem of Selecting the Shape Functions for A *p*-Type Finite Element: I. Babuška, M. Griebel and J. Pitkäranta 1891

Coupled use of Reduced Integration and Non-conforming Modes in Quadratic Mindlin Plate Element: C.-K. Choi and S.-H. Kim 1909

Accuracy in Finite Element Computation for Eigenfrequencies: P. Ladeveze and J. P. Pelle 1929

Combined Effect of Shear and Large Deformation on Stress Intensity Factors: R. S. Alwar and S. Thiagarajan 1951

LETTERS TO THE EDITOR 1965

ANNOUNCEMENTS 1969

CONFERENCE DIARY 1971

Issue No. 9

Free and Forced Vibrations of Plates by Boundary and Interior Elements: C. P. Providakis and D. E. Beskos. 1977

Analysis of Difference Diagrams Stability Approximating a Class of One- and Two-dimensional Non-linear Parabolic Field Equations: S. Wiak 1995

An Upwind Method for Solving Transport–Diffusion–Reaction Systems: A. Bermudez, J. Durany, M. Posse and C. Vazquez 2021

Efficient Approximation Concepts Using Second Order Information: C. Fleury. . . . 2041

A General and Effective Way for Evaluating the Integrals with Various Orders of Singularity in the Direct Boundary Element Method: W. Zhang and H.-R. Xu 2059

Multi-domain General Axisymmetric Stress Analysis by BEM: H.-C. Wang and P. K. Banerjee 2065

A Time–Space Finite Element Discretization Technique for the Calculation of the Electromagnetic Field in Ferromagnetic Materials: O. Axelsson and J. Maubach . . . 2085

Eigenproperties of Large-scale Structures by Finite Element Partitioning and Homotopy Continuation: Y. Zhang and R. S. Harichandran 2113

Advanced Development of the Boundary Element Method for Steady-state Heat Conduction: G. F. Dargush and P. K. Banerjee 2123

A Finite Element Model for Composite Beams Undergoing Large Deflection with Arbitrary Cross-sectional Warping: A. D. Stemple and S. W. Lee. 2143

Analysis of the Zienkiewicz–Zhu *a-posteriori* Error Estimator in the Finite Element Method: M. Ainsworth, J. Z. Zhu, A. W. Craig and O. C. Zienkiewicz 2161

Stress Computations for Nearly Incompressible Materials by the *p*-Version of the Finite Element Method: B. A. Szabo, I. Babuska and B. K. Chayapathy. 2175

Error Estimates and Convergence Rates for Various Incompressible Elements: O. C. Zienkiewicz, Y. C. Liu and G. C. Huang 2191

Numerical Study of Incompressible Fluids in Unbounded Domains: F. Razafimahery 2203

CONFERENCE DIARY 2219

Issue No. 10

CORRECTION ii

A Study of Stabilization and Projection in the 4-Node Mindlin Plate Element: X.-J. Wang and T. Belytschko 2223

A C^0 Finite Element Formulation for Thin-walled Beams: H. Chen and G. E. Blandford 2239

Three-dimensional Crack Analysis Using Singular Boundary Elements: Z. H. Jia, D. J. Shippy and F. J. Rizzo 2257

A Plate Bending Element Based on a Generalized Laminate Plate Theory: J. N. Reddy, E. J. Barbero and J. L. Teply. 2275

An Improved Procedure for Solving Transient Heat Conduction Problems Using the Boundary Element Method: K. Davey and S. Hinduja 2293

Modal Parameter Identification using *Z*-Transforms: N. C. Mickleborough and Y. L. Pi 2307

Assumed Strain Formulation for Triangular C^0 Plate Elements Based on a Weak Form of the Kirchhoff Constraints: H. K. Stolarski and M. Y. M. Chiang 2323

On Updating the Structure of Sparse Matrix Factors: K. H. Law 2339

The Dynamic Analysis of a Suspended Cable Due to a Moving Load: J.-S. Wu and C.-C. Chen. 2361

An Inverse Finite Element Method for Directly Formulated Free Boundary Problems: A. N. Alexandrou 2383

An Implicit Integration Algorithm with a Projection Method for Viscoplastic Constitutive Equations: K. Hornberger and H. Stamm 2397

A Time Domain Boundary Element Method for Poroelasticity: G. F. Dargush and P. K. Banerjee 2423

On the Problem of Modelling for Parameter Identification in Distributed Structures: M. A. Norris and L. Meirovitch 2451

BOOK REVIEW 2465

ANNOUNCEMENT 2466

CONFERENCE DIARY 2467

Issue No. 11

Automatic Mesh Generation from Solid Models Based on Recursive Spatial Decompositions: R. Perucchio, M. Saxena and A. Kela 2469

Numerical Analysis of Crack-tip Fields Using the Hodograph Transformation: S. A. Silling 2503

Static Non-linear Three-dimensional Analysis of a Riser Bundle by a Substructuring and Incremental Finite Element Algorithm: M. M. Bernitsas and N. Vlahopoulos . . . 2517

Towards Parallel I/O in Finite Element Simulations: C. Farhat, E. Pramono and C. Felippa 2541

The Use of Profile Reduction Algorithms with a Frontal Code: I. S. Duff, J. K. Reid and J. A. Scott 2555

Treatment of Corners in BIE Analysis of Potential Problems: S. P. Walker and R. T. Fenner 2569

A Mixed-variable Continuously Deforming Finite Element Method for Parabolic Evolution Problems. Part I: The Variational Formulation for a Single Evolution Equation: I. Kececioglu and B. Rubinsky 2583

A Mixed-variable Continuously Deforming Finite Element Method for Parabolic Evolution Problems. Part II: The Coupled Problem of Phase-change in Porous Media: I. Kececioglu and B. Rubinsky 2609

Static and Dynamic Analysis of Space Frames with Non-linear Flexible Connections: G. Shi and S. N. Atluri 2635

A FORTRAN Program for Profile and Wavefront Reduction: S. W. Sloan 2651

Status of the Finite Element Method in the Thermoforming Process: N. G. Zamani, D. F. Watt and M. Esteghamatian 2681

Delaunay Triangulation of Non-convex Planar Domains: S. H. Lo 2695

BOOK REVIEWS 2709

CONFERENCE DIARY 2713

Issue No. 12

A Mixed-variable Continuously Deforming Finite Element Method for Parabolic Evolution Problems. Part III: Numerical Implementation and Computational Results: I. Kececioglu and B. Rubinsky 2715

Efficiency of Group Implicit Concurrent Algorithms for Transient Finite Element Analysis: M. Ortiz, E. D. Sotelino and B. Nour-Omid 2761

An Efficient Through-thickness Integration Scheme in an Unlimited Layer Doubly Curved Isoparametric Composite Shell Element: S. M. Yunus, P. C. Kohnke and S. Saigal . 2777

Conforming Boundary Elements in Plane Elasticity for Shape Design Sensitivity: S. Saigal, R. Aithal and J. H. Kane 2795

Partial Hybrid Stress Element for the Analysis of Thick Laminated Composite Plates: H.-S. Jing and M.-L. Liao 2813

On the Rotation of Conductors of Finite Torsional Stiffness by Eccentric Snow Loading and Control of Rotation Using Counterweights: P. L. I. Skelton and G. Poots . . . 2829

Error Estimates and Adaptive Refinement for Plate Bending Problems: O. C. Zienkiewicz and J. Z. Zhu 2839

A Geometrically Non-linear Tensorial Formulation of a Skewed Quadrilateral Thin Shell Finite Element: H. T. Y. Yang and Y. C. Wu 2855

Smooth Postbuckling Stresses by a Modified Finite Element Method: E. Byskov . . . 2877

Selective Refinement/Derefinement Algorithms for Sequences of Nested Triangulations: M.-C. Rivara 2889

Fast Algorithm for Assembling Blocks of Global Equations in FE Programs: L. Ondris 2907

Tracing the Equilibrium Path Beyond Simple Critical Points: R. Kouhia and M. Mikkola 2923

CONFERENCE DIARY 2943
